Pascal Moor

Date of birth: 01 June 1990
Nationality: Swiss
Address: Austrasse 60, Basel 4051, Switzerland
Phone number: +41797599336
Email address: pascal.moor@gmail.com

Profile

RnD project lead with 8+ years at Roche Diagnostics with experiences spanning the development cycle — from hands-on lab experimentation and hardware/software verification to leading cross-functional teams and shaping early-stage product concepts. Passionate about creating solutions that empower patients and meet the challenges of a rapidly changing healthcare landscape — including decentralization of care, demographic shifts, and rising demand for scalable, self-managed testing and treatment options.

Work Experience

09/2024 – PRESENT
RISCH-ROTKREUZ, SWITZERLAND

Development Lead - Capillary Blood Testing
Roche Diagnostics

Lead innovation work streams to enable patients to collect capillary blood at home and post samples to the lab — an end-to-end concept spanning assays, hardware, data, and regulation.

- **Technology scouting & feasibility**: evaluated emerging technologies to bridge venous and capillary blood collection; defined the solution space for sample protection during postal transport.
- **Experimental design**: planned and ran equivalence studies between venous and capillary samples to substantiate capillary claims on core lab assays.
- **Business & value proposition**: shaped innovative business models with business leaders, including a pharma-facing opportunity, and gathered direct customer feedback.

06/2025 – PRESENT
RISCH-ROTKREUZ, SWITZERLAND

Definition Lead - Automated Urinalysis
Roche Diagnostics

Drive early-stage product definition for a fully automated urinalysis analyzer (strip + sediment) in a lean project setup

- Translate business inputs and Voice-of-Customer signals into feature descriptions, then decompose them into traceable product requirements with clear rationale.
- Guided feature decisions with cross-functional teams, balancing user value, technical feasibility, risk, and business impact.
- Ensured all requirements met regulatory, environmental safety, cybersecurity, and interoperability standards.

Work Experience

01/2022 – 01/2025 RISCH-ROTKREUZ, SWITZERLAND

Team Lead Instrument Integration
Roche Diagnostics

Led a team of up to 8 test engineers covering software and hardware verification of IVD analyzers under IVDR and GMP, while simultaneously acting as Integration Lead and Test Manager inside development projects.

- Merged two previously separate teams into one by redesigning project assignments — which also defused a long-running senior-engineer conflict and unlocked cross-team knowledge transfer.
- Established and led the R&D power-user group for the organisation-wide ALM tool transition, accelerating issue resolution and protecting project momentum.
- Partnered with cross-functional teams on testing strategy, risk mitigation, and quality improvement.

10/2019 – 12/2021 RISCH-ROTKREUZ, SWITZERLAND

Senior Development Engineer - Coagulation Diagnostics
Roche Diagnostics

Led multiple feasibility and validation projects in coagulation diagnostics — combining lateral leadership, hands-on lab work, and data-driven decision support for leadership.

- **Competitor technology investigation (M&A support)**: led a 3-person team to assess whether a competitor's coagulation reagents were superior to Roche's in-sourced reagents. Coached the team from scratch on application testing and general lab work; our findings fed a leadership decision to acquire the target's reagent division.
- **Lyophilisate glass-vial validation**: led validation of a newly sourced glass vial after the original manufacturing site burned down; released the new vials for our coagulation assays.
- Helped implement automated reporting systems for market and performance analysis, enabling data-driven strategic decisions and product improvements.

Work Experience

06/2017 – 10/2019 RISCH-ROTKREUZ, SWITZERLAND

Development Engineer & Application Specialist
Roche Diagnostics

- Verified clinical chemistry and immuno-assay reagents from a new Chinese site, ensuring compliance with EEA and Chinese regulations.
- Authored test and verification reports for health authority submissions; maintained GLP compliance in BSL-2 lab with human biological materials.
- Resolved field escalations and released system updates within a global life-cycle management team.

Education

09/2014 – 09/2016 ZÜRICH, SWITZERLAND

Health Science and Technology - Medical Technologies | Master of Science (MSc)
ETH Zürich

09/2011 – 02/2015 ZÜRICH, SWITZERLAND

Health Science and Technology | Bachelor of Science (BSc)
ETH Zürich

Certificates

09/2024

Dad
Family

05/2023

Associate Systems Engineering Professional (ASEP)
INCOSE

09/2021

Blockchain Basics
Coursera

01/2020

Applied Machine Learning in Python
Coursera

05/2019

Introduction to Data Science in Python
Coursera

05/2019

Applied Plotting, Charting & Data Representation in Python
Coursera

Skills

LEADERSHIP & MANAGEMENT

Cross Domain Leadership	**Professional**
Risk Management	**Professional**
	Professional
Customer Feedback Analysis	**Professional**

PRODUCT DEVELOPMENT

Product Lifecycle	**Professional**
Cross-functional Coordination	**Professional**
System Engineering	**Professional**
Verification & Validation	**Professional**
